Our building is set!
Are you pleased with the interventions you currently have in place? How do you know they are working?
We have some things in place, but have some work to do
RtI Interventions and Resources
We need to determine what interventions need to take place!
What does your student data tell you? Determine student need first!
How many Tier 2 students and Tier 3 students do you have?
What is the best delivery method of the interventions? During school day? After school day?
If no or are not sure, do you have the necessary resources?
What do you need to help students be successful?
How will you know the intervention is successful?
